Subject Index of Volume 19

Absorption
  X-ray, study of Cu ion exchanged H-mordenite for selective catalytic reduction of NO by ammonia, 247
Acetic acid
  carbonylation of aromatic aldehydes to phenylacetic acid derivatives catalysed by Pd–PPh_3–HCl system, 283
  catalytic oxidation of benzoic acid in: aromatic hydroxylation with *in situ*-generated hydrogen peroxide, 215
Acetone
  secondary reactions of base-catalysed aldol condensation of, 199
Acetoxylation
  Pd-catalysed benzylic, of toluene, 299
Acidic protons
  adsorption structures and mechanisms of hydrogen–deuterium exchange reactions of compounds with, 117
Adsorption
  structures and mechanisms of hydrogen–deuterium exchange reactions of compounds with acidic protons, 117
Alcohols
  computer simulation of reaction rate expression for methanol carbonylation reaction catalysed over $RhCl_3 \cdot 3H_2O$/HI, 15
  heteropolyanion-doped polypyrrole as catalyst for ethyl alcohol conversion, 223
  quantitative analysis on *ortho*-directing activities of divalent metal salts in hydroxymethylation of phenol by formaldehyde, 339
  redox cycle of metal-on-active carbon catalyst in vapour phase carbonylation of methanol, 191
  secondary reactions of base-catalysed aldol condensation of acetone, 199
Aldehydes
  aromatic; carbonylation of, to phenyl acetic acid derivatives catalysed by Pd–PPh_3–HCl system, 283
  quantitative analysis on *ortho*-directing activities of divalent metal salts in hydroxymethylation of phenol by formaldehyde, 339
Alkanes
  isomerization and hydrogenolysis reactions of hexanes over Pt catalysts supported on physical mixtures of TiO_2 and CeO_2, 259
  Ru catalysts: effects of type of support, method of preparation and conditions of use of Ru/TiO_2 catalysts on their behaviour in n-butane hydrogenolysis, 359
Alkenes, Olefins
  applications of chloro-aryloxide complexes of W in olefin metathesis: ring-opening metathesis polymerization of dicyclopentadiene, 157
  C_2H_4/He reaction on Rh/MgO studied by transient methods, 105
  ethylene hydrogenation over lanthanide-doped Cu and Ag catalyst systems (Eu–Cu, Yb–Cu, Eu–Ag and Yb–Ag), 271
  hydroformylation of polyisobutene, 1
  kinetics of hydrogenation of 1,2-epoxycyclododeca-5,9-diene on Pd catalysts, 95
  kinetics and mechanism of electron transfer from L-ascorbic acid to ethylenediaminetetraacetatoruthenium(V) oxo complex in aqueous medium, 33
Aluminium
  characterization of lanthana/alumina composite oxides, 235
  characterization of surface species of supported V_2O_5–Al_2O_3 catalysts by ^{51}V NMR, 61
Amines
  kinetics and mechanism of electron transfer from L-ascorbic acid to ethylenediaminetetraacetatoruthen-

ium(V) oxo complex in aqueous medium, 33
Ammonia
X-ray absorption study of Cu ion exchanged H-mordenite for selective catalytic reduction of NO by, 247
Ammoximation
of cyclohexanone over titanium silicate molecular sieve, TS-2, 383
synthesis of cyclohexanone oxime via, with molecular oxygen: reaction network, 171
Aromatic compounds
applications of chloro-aryloxide complexes of W in olefin metathesis: ring-opening metathesis polymerization of dicyclopentadiene, 157
carbonylation of aromatic aldehydes to phenylacetic acid derivatives catalysed by Pd–PPh_3–HCl system, 283
catalytic oxidation of benzoic acid in acetic acid: aromatic hydroxylation with *in situ*-generated hydrogen peroxide, 215
different chemical and catalytic behaviour of (η-indenyl)–Rh(η^4-COD) and $Cr(CO)_3$(μ-η:η-indenyl)Rh(η^4-COD) complexes, L1
heteropolyanion-doped polypyrrole as catalyst for ethyl alcohol conversion, 223
oxidation of hydroxybenzenes with oxygen catalysed by supported metal chloride catalysts in aprotic solvents: effects of supports and solvents on reactivity, 407
Pd-catalysed benzylic acetoxylation of toluene, 299
quantitative analysis on *ortho*-directing activities of divalent metal salts in hydroxymethylation of phenol by formaldehyde, 339
quantum chemical assignments for vibrational frequency of pyridine adsorbed on acidic or non-acidic sites, L19
transfer hydrogenation of cyclohexanone by Rh(II) carboxylato complexes containing 1,4-benzodiazepines as nitrogen ligands, 25
Ascorbic acid
L-: kinetics and mechanism of electron transfer from, to ethylenediaminetetraacetatoruthenium(V) oxo complex in aqueous medium, 33
Benzonase
contribution to study of enzymatic activity of, 419
Carbonylation
of aromatic aldehydes to phenylacetic acid derivatives catalysed by Pd–PPh_3–HCl system, 283
methanol, reaction catalysed over $RhCl_3 \cdot 3H_2O$/HI: computer simulation of reaction rate expression for, 15
vapour phase: redox cycle of metal-on-active carbon catalyst in, of methanol, 191
Cerium
isomerization and hydrogenolysis reaction of hexanes over Pt catalysts supported on physical mixtures of TiO_2 and CeO_2, 259
Chromium
different chemical and catalytic behaviour of (η-indenyl)–Rh(η^4-COD) and $Cr(CO)_3$(μ-η:η-indenyl)Rh(η^4-COD) complexes, L1
CO
and H_2: temperature-programmed desorption (TPD), reaction (TPR) and oxidation (TPO) of species formed on Rh/MgO after interaction with, 41
CO_2
methanation; surface species in, over amorphous Pd/zirconia catalysts, 347
Cobalt
kinetics of surface-catalysed oxidation of S(IV) by dioxygen in aqueous suspensions of cobalt(II) oxide, 393
Computer simulation
of reaction rate expression for methanol carbonylation reaction catalysed over $RhCl_3 \cdot 3H_2O$/HI, 15
Condensation
base-catalysed aldol, of acetone; secondary reactions of, 199
Copper
ethylene hydrogenation over lanthanide-doped Cu and Ag catalyst systems (Eu–Cu, Yb–Cu, Eu–Ag and Yb–Ag), 271
X-ray absorption study of Cu ion exchanged H-mordenite for selective catalytic reduction of NO by ammonia, 247

Cyclohexanone
ammoximation of, over titanium silicate molecular sieve, TS-2, 383
oxime: synthesis of, via ammoximation with molecular oxygen; reaction network, 171
transfer hydrogenation of, by Rh(II) carboxylato complexes containing 1,4-benzodiazepines as nitrogen ligands, 25

Desorption
temperature-programmed, (TPD), reaction (TPR) and oxidation (TPO) of species formed on Rh/MgO after interaction with H_2 and CO, 41
Disproportionation reaction
IR study of, of NO on NiY zeolite, L7

Electron transfer
kinetics and mechanism of, from L-ascorbic acid to ethylenediaminetetraacetatoruthenium(V) oxo complex in aqueous medium, 33
Enzymatic activity
contribution to study of, of benzonase, 419
Epoxidations
triperoxyniobium-containing polyoxoanion, novel, $SiW_9(NbO_2)_3O_{37}^{7-}$: synthesis, characterization, catalytic allylic epoxidations with H_2O_2 and preliminary kinetic studies, 323
Epoxy
kinetics of hydrogenation of 1,2-epoxycyclododeca-5,9-diene on Pd catalysts, 95

Gallium
FTIR spectroscopic evidence for key role of hydrogen in creating active state of Ga_2O_3/HZSM-5 mixed catalysts, L15

Helium
/C_2H_4 reaction on Rh/MgO studied by transient methods, 105
Heteropolyanion-doped polypyrrole
as catalyst for ethyl alcohol conversion, 223
Heteropoly oxometalate catalysts
12-: solution species generated during formation of, 137

H-mordenite
Cu ion exchanged, for selective catalytic reduction of NO by ammonia; X-ray absorption study of, 247
Hydroformylation
of polyisobutene, 1
Hydrogen
adsorption structures and mechanisms of hydrogen–deuterium exchange reactions of compounds with acidic protons, 117
and CO: temperature-programmed desorption (TPD), reaction (TPR) and oxidation (TPO) of species formed on Rh/MgO after interaction with, 41
FTIR spectroscopic evidence for key role of, in creating active state of Ga_2O_3/HZSM-5 mixed catalysts, L15
Hydrogenation
ethylene, over lanthanide-doped Cu and Ag catalyst systems (Eu–Cu, Yb–Cu, Eu–Ag and Yb–Ag), 271
kinetics of, of 1,2-epoxycyclododeca-5,9-diene on Pd catalysts, 95
transfer, of cyclohexanone by Rh(II) carboxylato complexes containing 1,4-benzodiazepines as nitrogen ligands, 25
Hydrogenolysis
and isomerization reactions of hexanes over Pt catalysts supported on physical mixtures of TiO_2 and CeO_2, 259
n-butane: effects of type of support, method of preparation and conditions of use of Ru/TiO_2 catalysts on their behaviour in; Ru catalysts, 359
Hydrogen peroxide
in situ-generated: aromatic hydroxylation with; catalytic oxidation of benzoic acid in acetic acid, 215
triperoxyniobium-containing polyoxoanion, novel, $SiW_9(NbO_2)_3O_{37}^{7-}$: synthesis, characterization, catalytic allylic epoxidations with H_2O_2 and preliminary kinetic studies, 323
Hydroxylation
aromatic, with *in situ*-generated hydrogen peroxide; catalytic oxidation of benzoic acid in acetic acid, 215
Hydroxymethylation
quantitative analysis on *ortho*-directing activities of divalent metal salts in, of phenol by formaldehyde, 339

Isomerization
and hydrogenolysis reactions of hexanes over Pt catalysts supported on physical mixtures of TiO_2 and CeO_2, 259

Lanthanum
characterization of lanthana/alumina composite oxides, 235
ethylene hydrogenation over lanthanide-doped Cu and Ag catalyst systems (Eu–Cu, Yb–Cu, Eu–Ag and Yb–Ag), 271

Magnesium
C_2H_4/He reaction on Rh/MgO studied by transient methods, 105
temperature-programmed desorption (TPD), reaction (TPR) and oxidation (TPO) of species formed on Rh/MgO after interaction with H_2 and CO, 41
Metal-on-active carbon catalyst
redox cycle of, in vapour phase carbonylation of methanol, 191
Metathesis
applications of chloro-aryloxide complexes of W in olefin metathesis: ring-opening metathesis polymerization of dicyclopentadiene, 157
Methanation
CO_2; surface species in, over amorphous Pd/zirconia catalysts, 347

Nickel
IR study of disproportionation reaction of NO on NiY zeolite, L7
supported, catalysts for ethylene oligomerization, 129
Niobium
triperoxyniobium-containing polyoxoanion, novel, $SiW_9(NbO_2)_3O_{37}^{7-}$: synthesis, characterization, catalytic allylic epoxidations with H_2O_2 and preliminary kinetic studies, 323
Nitric oxide
IR study of disproportionation reaction of, on NiY zeolite, L7
X-ray absorption study of Cu ion exchanged H-mordenite for selective catalytic reduction of, by ammonia, 247

Olefins: see Alkenes

Oligomerization
ethylene: supported Ni catalysts for, 129
Oxidation
catalytic, of benzoic acid in acetic acid: aromatic hydroxylation with *in situ*-generated hydrogen peroxide, 215
of hydroxybenzenes with oxygen catalysed by supported metal chloride catalysts in aprotic solvents: effects of supports and solvents on reactivity, 407
surface-catalysed, of S(IV) by dioxygen in aqueous suspensions of cobalt(II) oxide; kinetics of, 393
temperature-programmed desorption (TPD), reaction (TPR) and oxidation (TPO) of species formed on Rh/MgO after interaction with H_2 and CO, 41
Oxygen
kinetics of surface-catalysed oxidation of S(IV) by dioxygen in aqueous suspensions of cobalt(II) oxide, 393
oxidation of hydroxybenzenes with, catalysed by supported metal chloride catalysts in aprotic solvents: effects of supports and solvents on reactivity, 407
synthesis of cyclohexanone oxime via ammoximation with molecular oxygen: reaction network, 171

Palladium
carbonylation of aromatic aldehydes to phenylacetic acid derivatives catalysed by Pd–PPh_3–HCl system, 283
-catalysed benzylic acetoxylation of toluene, 299
kinetics of hydrogenation of 1,2-epoxycyclododeca-5,9-diene on Pd catalysts, 95
surface species in CO_2 methanation over amorphous Pd/zirconia catalysts, 347
Platinum catalysts
isomerization and hydrogenolysis reactions of hexanes over, supported on physical mixtures of TiO_2 and CeO_2, 259
Polyisobutene
hydroformylation of, 1
Polymerization
ring-opening metathesis, of dicyclopentadiene: applications of chloro-aryl-

oxide complexes of W in olefin metathesis, 157

Quantum chemical assignments
for vibrational frequency of pyridine adsorbed on acidic or non-acidic sites, L19

Reaction rate
expression for methanol carbonylation reaction catalysed over $RhCl_3 \cdot 3H_2O$/HI; computer simulation of, 15
Reduction
selective catalytic; X-ray absorption study of Cu ion exchanged H-mordenite for, of NO by ammonia, 247
Rhodium
C_2H_4/He reaction on Rh/MgO studied by transient methods, 105
computer simulation of reaction rate expression for methanol carbonylation reaction catalysed over $RhCl_3 \cdot 3H_2O$/HI, 15
different chemical and catalytic behaviour of (η-indenyl)–Rh(η^4-COD) and $Cr(CO)_3(\mu$-η:η-indenyl)Rh(η^4-COD) complexes, L1
temperature-programmed desorption (TPD), reaction (TPR) and oxidation (TPO) of species formed on Rh/MgO after interaction with H_2 and CO, 41
transfer hydrogenation of cyclohexanone by Rh(II) carboxylato complexes containing 1,4-benzodiazepines as nitrogen ligands, 25
Ruthenium
catalysts: effects of type of support, method of preparation and conditions of use of Ru/TiO_2 catalysts on their behaviour in n-butane hydrogenolysis, 359
catalysts: oxides of first row transition elements as modifiers of Ru/SiO_2 catalyst, 75
kinetics and mechanism of electron transfer from L-ascorbic acid to ethylenediaminetetraacetatoruthenium(V) oxo complex in aqueous medium, 33

Silicon
ammoximation of cyclohexanone over titanium silicate molecular sieve, TS-2, 383
Ru catalysts: oxides of first row transition elements as modifiers of Ru/SiO_2 catalyst, 75
triperoxyniobium-containing polyoxoanion, novel, $SiW_9(NbO_2)_3O_{37}^{7-}$: synthesis, characterization, catalytic allylic epoxidations with H_2O_2 and preliminary kinetic studies, 323
Silver
ethylene hydrogenation over lanthanide-doped Cu and Ag catalyst systems (Eu–Cu, Yb–Cu, Eu–Ag and Yb–Ag), 271
Spectroscopy
characterization of surface species of supported V_2O_5–Al_2O_3 catalysts by ^{51}V NMR, 61
FTIR spectroscopic evidence for key role of hydrogen in creating active state of Ga_2O_3/HZSM-5 mixed catalysts, L15
IR study of disproportionation reaction of NO on NiY zeolite, L7
X-ray absorption study of Cu ion exchanged H-mordenite for selective catalytic reduction of NO by ammonia, 247
Sulphur
kinetics of surface-catalysed oxidation of S(IV) by dioxygen in aqueous suspensions of cobalt(II) oxide, 393
Surface-catalysed oxidation
kinetics of, of S(IV) by dioxygen in aqueous suspensions of cobalt(II) oxide, 393
Surface species
characterization of, of supported V_2O_5–Al_2O_3 catalysts by ^{51}V NMR, 61
in CO_2 methanation over amorphous Pd/zirconia catalysts, 347

Titanium
ammoximation of cyclohexanone over titanium silicate molecular sieve, TS-2, 383
isomerization and hydrogenolysis reactions of hexanes over Pt catalysts supported on physical mixtures of TiO_2 and CeO_2, 259
Ru catalysts: effects of type of support, method of preparation and conditions of use of Ru/TiO_2 catalysts on their behaviour in n-butane hydrogenolysis, 359

Transition elements
first row: oxides of, as modifiers of Ru/SiO_2 catalyst; Ru catalysts, 75
Tungsten
applications of chloro-aryloxide complexes of, in olefin metathesis: ring-opening metathesis polymerization of dicyclopentadiene, 157
triperoxyniobium-containing polyoxoanion, novel, $SiW_9(NbO_2)_3O_{37}^{7-}$: synthesis, characterization, catalytic allylic epoxidations with H_2O_2 and preliminary kinetic studies, 323

Vanadium
characterization of surface species of supported V_2O_5–Al_2O_3 catalysts by ^{51}V NMR, 61
Vibrational frequency
quantum chemical assignments for, of pyridine adsorbed on acidic or non-acidic sites, L19

Zeolites
ammoximation of cyclohexanone over titanium silicate molecular sieve, TS-2, 383
FTIR spectroscopic evidence for key role of hydrogen in creating activate state of Ga_2O_3/HZSM-5 mixed catalysts, L15
IR study of disproportionation reaction of NO on NiY zeolite, L7
Zirconium
surface species in CO_2 methanation over amorphous Pd/zirconia catalysts, 347
